User's Guide

Version 1.0

# Key Usages

## 1. Drag pin position

Drag pin flag at the pin position of the day.

## 2. Confirm current GPS position

Drag GPS position at the real position if necessary

## 3. Consider altitude difference

Use cam view for Elevation service  
real yards = horizontal yards (+/-) altitude difference

## 4. Consider height of tree or Green images

Use cam view to measure the angle over a tree and Green Image View

## 5. Track the shot

Click the Shot button to count score and to measure the previous shot distance.

## 6. Save score

Rotate your phone on landscape, then scorecard will be displayed.  
Enter your score by hole. Your score will be managed by m.phigolf.com.  
Performance report will be supported.

## Selecting a Course

### Favorites

Favorites will appear after you play a round.

### Search

Enter a golfclub name more than 3 characters.

### Nearby

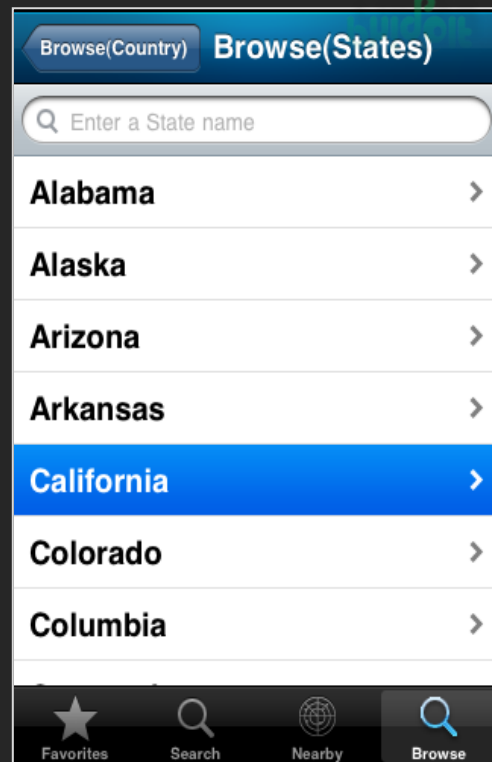

Display golfclubs that are near your location.  
If you do not see golfclubs near you,  
use other methods(Search, Browse).

### Browse

Search for golfclub by Country>States>Cities.  
Only USA, States is used

### Starting Hole / 9-Hole Only Rounds

Select your golfclub and Course. Once playing, scroll to your starting hole by pressing the arrows(next or previous hole symbols).

Touch tabs to select course  
selection methods

## Map View

### TouchPoint Positioning

Touch anywhere on the map to view distance to that point and from that point on the green.

### Track Shots

Press the shot icon  at any time to begin tracking the distance of a shot. This is for tracking distance and it count the score. But the score should be modified on Scorecard view(Landscape the phone).

### Recommend Club - W5 (5Wood)

Phigolf Navi recommends the proper club number (according to setting my club)

### Green View

Green view displays green slope images or photos which is uploaded by other golfer or by phigolf manager. Visit [m.phigolf.com](http://m.phigolf.com) for more.

### Draggable Tee/Green, GPS Markers

You can drag the marker if necessary

# Cam View

## Real distance & Recommended club

Cam view measure the altitude difference.(height)  
Real distance = horizontal distance +/- height  
Recommended club is calculated by my club distance which is settings variables.

185-36 = 149 / 

H 01 185-36 = 149 /  Close

## Altitude Angle

This help you to select club which loft is larger than the altitude angle.

Quick Tips:

# Mobile & Web Convergence
